3D/4D ultrasounds are only done at our new state-of-the-art facility in Fredericksburg, Virginia.

The advent of 3D/4D technology allows us to introduce a whole new dimension to ultrasound imaging. Now, expectant parents can share the first encounter with their child unlike ever before. Here at the Central Virginia OB/GYN Group, we are proud to introduce cutting-edge 3D/4D sonograms to growing families—bringing images of their unborn baby to life. With our state-of-the-art GE Voluson 730 Pro ultrasound machine, images and movements can be seen with clarity that is difficult or impossible to attain with traditional 2/D scanning.

From a stretch to a yawn or a tiny waving hand, your sonogram will allow you to take a peek at your baby's first movements in the womb.

Take part in this incredible experience. We are gladly offering this opportunity for you and your family to share in the ultimate "first encounter" with the newest addition to your family.

The thrilling experience of seeing your baby's face with such clarity will truly touch your heart!
